

**Department of B. Tech First Year B.Tech.**

**I<sup>st</sup> Sem Session 2026-27 (ODD Semester)**

**Assignment - 1**

**Subject Name: Programming Language**

**Subject Code: ACS 101**

**Date of Assignment: 21.09.2026**

**Date of Submission: 05.10.2026**

| Q.No. | Questions                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Marks | CO | KL |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|----|----|
| 1     | a) Differences between Linker and loader.<br>b) Differences between Source Code and Object code.<br>c) What is a keyword? How is it different from an identifier?<br>d) What is the significance of ; in a C program<br>e) What is a token in C? What is the need of tokens in programming languages?                                                                                                                                                                  | 5     | 1  | K3 |
| 2     | Explain structure of basic C program with suitable example.                                                                                                                                                                                                                                                                                                                                                                                                            | 5     | 1  | K3 |
| 3     | Explain all the Operators in C. (Arithmetic, Increment-decrement, logical, relational, conditional, assignment operators)                                                                                                                                                                                                                                                                                                                                              | 5     | 1  | K3 |
| 4     | a) What is the difference between declaration and initialization of a variable?<br>b) Write execution flow of a C Program or write the steps of execution of a C program.                                                                                                                                                                                                                                                                                              | 5     | 1  | K3 |
| 5     | <b>Write a C program for the following:</b><br>a) To Swap two numbers without using a third variable<br>b) To find sum and average of any 3 numbers<br>c) To find Percentage of a student (assume 5 subjects of 100 marks each)<br>d) To find gross salary of an employee (assume the salary of an employee has three components basic, DA and HRA and is the sum of these three components)<br>e) Write a program to determine whether a character is a vowel or not. | 10    | 1  | K3 |

**Signature & Name of Faculty**

**HoD Signature**

**Date:**

**Date:**

**CO** - Course Outcomes mapped with respective question

**KL** - Bloom's Knowledge Level (K1, K2, K3, K4, K5, K6)

**K1** – Remember, **K2** – Understand, **K3** – Apply, **K4** – Analyze, **K5** – Evaluate, **K6** - Create

**Note: Use a Separate copy to write the answers. Avoid copying assignments**
